

BRIEFING

## Implementation of the Stability and Growth Pact: January 2015

This document gives an overview of key elements under the preventive and corrective arms of the Stability and Growth Pact (SGP), against the background of the autumn 2014 European Commission (EC) forecast and the [EC Opinions](#) of compliance of the 2015 Draft Budgetary Plans (DBP) of euro area Member States with the SGP. Data are compiled according to the European System of Accounts ([ESA 2010](#)) which came into force in September 2014.

The concept of "structural balance" is explained in the specifications on the implementation of the Stability and Growth Pact, on page 21 of "[Building a strengthened fiscal framework in the EU](#)" and on the [IMF website](#). Please note that the "structural effort" in this column is not the same as "effective action"/"fiscal effort", as the assessment of effective action by the EC takes also into account revisions of potential output growth compared to that assumed at the time of the recommendations, the impact of the composition of economic growth or of other windfalls/shortfalls on revenue and other considerations. For further information please see 2014 [Public Finances Report in EMU](#) (p.32-41), p. 62-67 of the [SGP Vademecum](#), and the Communication "[Making the best use of flexibility within the existing rules of the SGP](#)".

<sup>8</sup> Members States which have a structural balance position at or above their MTO do not have an expenditure benchmark, since the latter is used to assess why the MTO has not been reached; for those Member States, the table includes "n.a." (= not applicable).
